Forecast For The United Kingdom
Issued by Met Office Exeter
at 1500 on Thursday 13 May 2021

UK Outlook for Friday 28 May 2021 to Friday 11 Jun 2021:
Confidence is low for this outlook as is typical of late spring and early summer. However perhaps a trend to rather more settled conditions as we move into early June with more in the way of dry weather and sunshine. With this we are likely to see a recovery in temperature too, although at this stage there is no strong signal for any very warm weather.
